

### Editorial...

*Recent scenario in the changing education system.*

*The news paper has presented the changing concept of state syllabus to central syllabus and a common national level entrance test for medical, dental & engineer courses at the all India level conducted by central board of secondary education under ministry of human resource and development, government of India from the forth coming year. Through this change in system we hope to have quality education who choose to do professional degree and career.*

*The existing 300 dental colleges in India should have better future for the dissemination for the quality education, whether it is boon or bane, lets wait and watch*
