

Editor's message

It is indeed a proud moment for me to be a editor of CODS journal for the year 2013. The arena of theoretical knowledge and clinical skill will upgrade the dentist for the maintenance of oral health. Currently the journal has articles, case reports, reviews, achievements of staff and student activites.

Dentistry is evolving at a rapid pace with new concepts and research and search for excellence in dentistry remains a challenge. We are committed to report research findings and exploring new ideas, methods and advancement in technology in various dimensions of dentistry.

The timely advice of the member of the board has catalyzed the publication of this journal.

I request all the authors to submit research and original articles which will be of great help for indexing at higher level.
