

Editor's message

The most impressive saying by Albert Einstein is "A person , who never made a mistake ,never tried anything new." This is true when any professional explores new things or involved in innovative activity, but every new unintentional mistake can be considered as new objective and a definite solution can be drawn.

To commemorate teachers' day I would like to quote the best Sanskrit proverb "agnanathi mirandasya gnanjana ihalakaya chakshuranmelitha yena thasamayari guruvanamah", in brief it means that, teacher (guru) is a respectable person who focus light of knowledge to everyone.

Soin the modernisation dynamic and potential teachers are required to explore innovative things in the health profession.

All the seniors and colleagues have provided good material and support to improve the quality of this issue, we seek the same support in the future.
